

# Integration Projects

## Lists of Integrated Systems

### Global Distribution Systems

1. These systems have been integrated multiple times for clients in Germany, Ireland and the UK. Regional differences apply.
2. Our business analysts can advise on the selection of the best GDS system based on your business and the geographical area that you target.
3. Generation\_P Consulting is not a GDS representation company and is not affiliated with any GDS.

GDS	Site	Travel Offer	Technology
Amadeus	<a href="http://www.amadeus.com">http://www.amadeus.com</a>	flights	SOAP, XML
Galileo (integrated twice – for a client in Germany and a client in the UK)	<a href="http://www.galileo.com">http://www.galileo.com</a>	flights, package tours	Stadis (binary protocol); SOAP, XML
Sabre (integrated twice – for clients in Germany)	<a href="http://www.sabre-holdings.com">http://www.sabre-holdings.com</a>	flights, apartments, package tours	Stadis (binary protocol); SOAP, XML (xGate 2 XML API)
Worldspan	<a href="http://www.worldspan.com">http://www.worldspan.com</a>	flights, apartments, package tours	XML (ZTS API)

### Central Reservation Systems

1. These systems are peculiar to the German travel market. They act as hubs to the tour operator systems and only route messages.
2. Stadis protocol (also known as TOMA) implies the use of the INFX format for offers import. Stadis is the most popular binary booking protocol in Germany.

CRS	Site	Travel Offer	Technology
START (Amadeus)	<a href="http://www.amadeus.de">http://www.amadeus.de</a>	package tours	Stadis (binary protocol)
DCS (Sabre/Merlin)	<a href="http://www.sabre-holdings.com">http://www.sabre-holdings.com</a>	flights, package tours	Stadis (binary protocol)
RIO		package tours	Stadis (binary protocol)

### Travel Content Providers

Travel Content Providers	Site	Travel Offer	Technology
GIATA (integrated twice – for clients in Germany)	<a href="http://www.giata.de">http://www.giata.de</a>	hotel information	HTTP; XML
Travel CMS (integrated twice – for clients in Germany)	<a href="http://www.travelcms.de">http://www.travelcms.de</a>	hotel information	SOAP, XML
ITS	<a href="http://www.its.de">http://www.its.de</a>	hotel information	XML

## Travel Offer Suppliers

- Integration with German tour operators was realized through CRS/GDS systems but each tour operator connection was an integration project of itself: German reservation systems (with the exception of the latest Sabre xGate 2 interface) act as hubs that route messages to and from the tour operators' systems. Consequently, we faced every individual tour operator system on our own without the help from the reservation system (CRS/GDS).
